vol 4-2

4/11/68, No. 487 lab to memphid on same tests with Memphis' airtel of 4/6, some notes. frazier's affidavit and xeroxes of pix attached. obviously frazier's affidavit of a blank date in June was not originally attached to this 4/11 record. Neither it nor other attachments bear other file identification. It and most of the others are remote-generation rexeroxes.
What has been attached is not all. It should be compared with what Wiseman produced. For maskings in particular.

4/10/68 No. 497, WFO Airtel to DIrector with photo of suspect. Called suspect.
